To the Contractor—

OUR CUSTOMER

You will find in this our new "Contractors' Catalogue" that we have made the book helpful to you in suggestions to your customer the "Owner."

The great variety of up-to-date designs of "Built-in-Furniture" and "Interior Trim Units" as well as all items of Millwork are of more than ordinary interest as they are "Modern" designs up-to-date in every respect.

We ask that you give this Catalogue a place on your desk where it will be referred to often and hope it will impress you with the thought that "Riverdale" Millwork is the best and will satisfy your customer.

We Guarantee

THAT EACH AND EVERY ARTICLE IN THIS CATALOGUE IS EXACTLY AS DESCRIBED

We Guarantee that any article purchased from us will satisfy you perfectly if ordered correctly.

If any article is not satisfactory in every way through our error, you can return it to us at our expense.

We will return your money including any transportation charges you have paid.

All prices shown are F. O. B. cars Chicago, Illinois

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Very Liberal Payment Terms

1. PUBLIC BUILDINGS where Bond protects materials.

We ship to you and accept our payments monthly, enabling you to pay us as fast as you are entitled to money on your contract; final payments being made within thirty days after our final delivery.

2. BANK GUARANTEE sent to us with order.

We ship to you and accept our payments within three days after each arrival for materials you found satisfactory, and allow you 1% cash discount on such payments. (Use our forms. Read above preface for complete explanation.)

3. CASH WITH ORDER—2% Cash Discount.

Orders for less than $5.00 materials are to be accompanied by CASH.
"ODD-WORK"—made special, not ordered under conditions of Terms 1, Public Buildings, or Terms 2, Bank Guarantee, is payable CASH WITH ORDER.
All quotations made are subject to 2% Cash Discount for full payment "CASH WITH ORDER" unless specifically quoted otherwise.

4. PARTIAL ADVANCE Payment with Order — 1½% Cash Discount.

When Customers desire to make a payment in advance to cover part of order and send in BANK GUARANTEE for balance—or instruct shipment sent with BILL-LADING and invoice to Banker for payment at bank of balance on arrival —we then allow 1½% Cash Discount on Partial Payment and 1% Cash Discount on Final Payment.

5. PAYMENTS AT BANK—C. O. D. When Materials Arrive—1% Cash Discount.

We ship stock materials without partial advance payments (except such as involve unusual freight express) and send BILL-LADING with invoice to your bank for payment when each shipment arrives, allowing 1% Cash Discount.

6. PAYMENTS AT BANK—C. O. D. EXAMINATION PRIVILEGE—1% Cash Discount.

We ship stock materials under this arrangement, also "ODD-WORK" if half value advance payment for special manufacture is made. BILL-LADING is sent to your bank with invoice for payment on each arrival. Your bank holds payment three days to allow unloading and inspection of materials. If any materials are not as sold to you, bank withholds value of those specific items until adjusted to the satisfaction of the buyer and seller.

for "FACTS ABOUT FREIGHT CHARGES" *see pages 198 and 199*

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Very Liberal Payment Terms

(Continued)

Many of our regular customers send us cash in advance with their order so they may take advantage of the cash discount we offer. We do not ask this, neither would we expect it where we have not sold previously and established confidence in our goods—our service—our honest dealing.

WE DO NOT EVEN ASK THAT YOU PAY FOR YOUR GOODS C. O. D.

OUR BEST GENERAL PROPOSITION is one which is based to your interest and at the same time is satisfactory assurance to us that if our goods are as represented the money will be forthcoming. This offer is that you have your Banker sign the GUARANTEE (our form), indicating that you have on deposit, or have by arrangement amount sufficient to pay for this order (you or the Banker can hold a copy), mailing this SIGNED GUARANTEE to us with your order—then goods are shipped to you—Bill Lading is sent to you—goods are unloaded by you—goods are inspected by you. After all this is done and within three days after each arrival, you call up your Banker and request that he send to us the payment for the shipment less 1% Cash Discount, provided you found everything satisfactory.

REMEMBER, if any items you find are not according to the order, you have only to tell your Banker the value of such items and instruct him to deduct this from our bill, he sending the amount deducted after mistake is adjusted. This GUARANTEE arrangement shows you that we have confidence in our goods and are willing to make this arrangement so that you are fully protected.

Odd-Work manufactured "Special" can be purchased without any advance payment where the Banker's Guarantee forms are used, which is also an advantage to you worth adopting in placing your orders.

When materials are sold freight paid by us to your station, you are authorized to send in to us or turn over to your Banker as the equivalent of cash such "original" freight receipts covering such shipments and these receipts will be accepted from your bank by us in part payment of your invoice.

PREPAY FREIGHT STATIONS—If there is no agent at railway station where goods are to be shipped Terms 2, BANK GUARANTEE, or Terms 3, CASH WITH ORDER, only will apply on such orders.

CAUTION—Always examine and count shipments before you take them from railway depot. See page 195.

SEND US YOUR PERSONAL CHECKS, if it is easier for you, which we will accept at full value, although we prefer that payments be made by Chicago Draft, New York Draft, Express Money Order, or Postal Money Order.

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Our Organization for Service

In the two preceding pages we introduce our **Organization,** many of them known personally to our thousands of **Contractor Customers,** and in these pages we illustrate a few Buildings for which we furnished the **Millwork.**

This Book is in itself a surprisingly beautiful exhibit of the finest **Millwork Designs** ever shown in any Catalogue offering to the **Contractor** an almost unlimited variety of the latest styles in **Built-In Furniture, Interior Trim, Doors, Windows, Hardware, etc.**

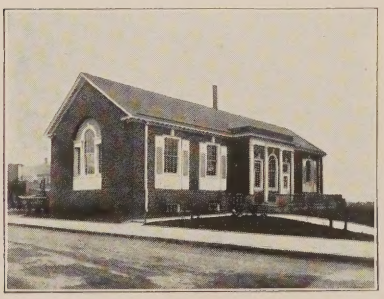
Visitors who go through our Door, Sash and Molding warehouses and factories are impressed with the fact that our millwork is superior to any stock they have seen.

Don't make the mistake of looking upon this book as a catalogue of cheap millwork products.

ZELLA GAMBLE MEMORIAL
FIRST M. E. CHURCH
Architect, Gilbert M. Turnbull

AMERICAN BRIDGE COMPANY
DORMITORY
Architect, A. Frank Wickes

PRESBYTERIAN CHURCH
Architect, Lewis H. Sturges



LIBRARY BUILDING
Architect, A. Frank Wickes

On the contrary, it is a catalogue of high-grade **Millwork that stands in a class of its own.** You can be sure, however, that the prices, quality considered, are the lowest that can be quoted. We could sell a lower grade for less money, but we could not give you the same high quality.

While you may occasionally have millwork offered to you at a lower price than ours, you must remember there is all the difference in the world between superior and inferior millwork. You could not expect a $15.00 watch to give you the service of a $100.00 watch. You would not get the same amount of wear and pleasure out of a $10.00 suit of clothes that you might reasonably expect from a $50.00 suit. Reasoning along the same lines, you can be very sure that when you pay even a little more for

our millwork it is well worth more than the difference in price.

If you are looking for millwork products made of poor material that will not last and that can be sold for almost any price, you have the wrong catalogue. If you want material that you and your customer—the **Owner**—will be proud of, that will last a lifetime and that costs less than some of the inferior millwork on the market, **this is your book.** Look through its pages now and make up your order. Our policy provides that **you must get your money back if you are not satisfied** in every way.

MILLWORK TO SPECIAL ORDER

Orders for Odd Sizes and Special Designs Executed Promptly and Correctly, at Reasonable Prices

With our modern factory equipment, our expert draughtsmen and skilled workmen, and our large stock of the finest air-seasoned and kiln-dried lumber, we are in a position to turn out special orders promptly and satisfactorily.

Estimates on this class of work will be cheerfully furnished on receipt of Plans and Specifications. We take off quantities from plans, guarantee to furnish complete and quote delivered prices.

We have contractor customers in practically every locality in the United States, and on request will be pleased to refer to some contractor in your own neighborhood who has done business with us.

Our Money Back Guarantee

Money Refunded and Freight Paid Both Ways if Goods Are Not as Represented

The very life-blood of our business is the confidence and good will of our thousands of Contractor customers. The steady and unprecedented growth in our volume of business comes from the continued patronage of the Contractors with whom we deal.

Why You Should Employ an Architect

WHY should you employ an **Architect** to Design and Superintend the construction of your new Building? The arguments in favor of doing so are numerous. Let us, then, consider just a few of the most important.

It requires not only brains to design a Bungalow, Cottage or Residence, but a great deal of skill and experience as well. No intelligent person would attempt to build a Factory, Business Block, Church or School without a plan drawn by an **Architect.** Why, then, attempt it on a small house, which is a great deal more difficult to plan, as every item of cost must be kept down to the minimum, every inch of space utilized, and every beautiful architectural feature obtained at the lowest possible cost?

When it comes to planning the arrangement of rooms an **Architect** has a decided advantage, because he is more familiar with the problem of planning. **Architects,** in close touch with the work of others (as well as their own work), usually succeed in cleverly arranging space without waste. Having had so much experience, they know almost at a glance the arrangement of rooms which will yield the utmost comfort and convenience at minimum of cost, and they can tell by a little study the sort of house that will most likely fit the building site and prove most comfortable for the family.

Use plans by all means—well drawn, accurate plans prepared by an **Architect** with a reputation sufficiently good to assure you of good results.

Claims made against **Ready-Made-Plans** are that the owner does not receive the individual consideration he gets when his plans are made to order. For instance, let us say that a **Ready-Made-Plan-Architect** makes up a design for a $4,000 house. He gets ready one hundred sets with specifications, all alike, and these are featured in his book of plans. From all parts of the country one hundred buyers purchase these plans and build duplicate houses. Now, the chances are that only a very small portion of these hundred buyers are exactly suited by these plans. They selected this house because it comes nearest to what they want. If plans had been made to order they would have secured a house precisely as they wanted it, and in this case there would have been, no doubt, one hundred different houses instead of one hundred duplicate houses.

The selection of ready-made plans is too much of a task for the average inexperienced owner. He (the owner) looks through plan books and views

(Continued on next page)

Why You Should Employ an Architect

(Continued from preceding page)

various designs, but how is he to know how to select the house which best fits his lot or which will cost least, and make his family most comfortable?

You should also consider the advantage your **Architect** has over the ready-made plans in that he is familiar with your building site and peculiar local conditions; that is, a ready-made plan made for a house to face the East will not be at all satisfactory if your lot is for a West front. Also a plan for a house intended to be built in Wisconsin cannot be built satisfactorily or economically in North Carolina.

We must also consider that the owner will require in the erection and equipment of a building not only a carpenter and a mason, but five or six different tradesmen. As a rule, he is not very familiar with the different branches and will have to depend on the advice each of the several mechanics have to give. They may all be honest men who would not take undue advantage of the owner on account of his unfamiliarity with the work to be done, but there are nevertheless great obstacles in the way, one of which is the fact that it is very nearly impossible to secure adequate competition in the way of proposals on the work. Having no proper working drawings illustrating the work in detail and no complete specifications in which descriptions of the quality and quantity of the work required is given, how can any two men know that they are bidding on the same thing? They do not know, hence the owner cannot tell whether he will get what he thinks he is contracting for, or not.

The owner who selects a competent **Architect** to prepare plans and specifications does, on the other hand, not only save his own time and trouble, but is in position to call for bids in an intelligent manner. The fee he pays for the **Architect's** services is small in comparison to the amount saved by competitive bids, on exactly the same thing, in the various different contracts. There is an advantage in having the master builder (the **Architect**) in charge, who is familiar with all the different branches of the work.

With very few exceptions, the fee paid for **Architect's** plans is offset several times over by the benefit the owner derives in way of lower cost for material and labor and in the quality of the work as a whole.

Home-made or Mail Order Plans are a detriment to the Home Builder, as usually the extras involved are greatly in excess of the cost of a set of well-prepared plans drawn by a competent **Architect.**

If you are still undecided, we ask that you compare Buildings on which an **Architect** was employed with one built from a set of Mail Order Plans, and we are confident you will agree that it will be wise to **EMPLOY AN ARCHITECT.**

We Can Help You on Architect's Plans

Oftentimes it is inconvenient for you to make a complete list of millwork required for a building, on account of the intricate details and plans made by the architect. If you will send us plans, details and complete specifications, **OUR FORCE OF PLAN ESTIMATORS** will relieve you of all that trouble.

OUR ESTIMATE WILL SHOW YOU

A Delivered Price on the Entire List of Items.
Quantities Guaranteed.

Even if the plans are not large or difficult to figure, send them to us. We will gladly figure them for you and quote you a delivered price on the complete bill of Millwork required.

HOW TO SEND PLANS

Mail Plans first-class postage addressed to us at Riverdale Station, Chicago, Illinois, or ship them by Express to us at Dolton Station, Cook County, Illinois.

While we figure Millwork from Plans, we must ask our customers to furnish their own list of Lumber, Flooring, Shingles, etc., as we do not figure these items from plans under any circumstances.

Small orders placed with us have the same careful attention as though they were orders for carloads. It is a trial order we want.

OUR SAFE DELIVERY GUARANTEE

is printed on page 195. Read the entire page. It tells you what to do in case the railroad company delays or damages a shipment, or is short any bundles.

Your Design of Cabinets

We illustrate in the accompanying pages a number of selections of designs of

SIDEBOARDS, BUFFETS, COLONNADE OPENINGS, KITCHEN AND PANTRY CASES

which have proven very popular with our trade.

REMEMBER, we do not confine ourselves to these designs, but can manufacture CABINET WORK of any design from Architect's details or from your suggestions. If you have an idea you want worked out, send us a sketch showing measurements of space to be filled, also give us an idea of what is wanted and our draftsman will get out detailed drawings for you.

By a little personal care and pride your Built-in Furniture may be made to combine striking beauty and great utility without any extra cost.

Send us a picture of a sideboard which strikes your fancy, giving us width, length and depth to fit the opening you will place it in and we will make you a drawing to proper proportion showing you a picture of just what you will get. Or, we will make up a combination of a top of one of our cases and bottom of another —or if you would like a case with drawers where doors show in the cut—in fact, we'll make a drawing to suit your ideas if you will give us the idea.

We will be pleased to quote prices on application, or give any information you desire.

OUR CABINET WORK

is all made of thoroughly kiln dried lumber by skilled mechanics and is the same quality as any high grade BUILT-IN FURNITURE should be.

Our Stock Taft Sideboard

See illustration opposite page.

IN STOCK IN YELLOW PINE AND PLAIN RED OAK

Your sideboard should serve the double purpose of providing a place for ornamental glass and china and being in itself a beautiful piece of furniture.

As it is usually your most ornamental millwork feature and is subject to close scrutiny, it should be given more than ordinary care in construction.

Our Cabinet Department, having the advantages of the most skilled mechanics, selected clear lumber and perfect facilities for thoroughly kiln drying, turn out sideboards that will stand every test.

Our Stock Taft Sideboard (actual photograph on opposite page) is our most popular and best selling design.

Do you wonder how we can sell so elaborate a sideboard at the price? The demand for this design has been so heavy we manufacture them in lots of 100, reducing the cost of production 20 per cent.

Price of stock size to set in recess in wall as shown in floor plan,
(6 feet wide, 5 feet 4 inches high, 10½ inches deep.)

Yellow Pine, $40.00; Plain Red Oak, $45.00.

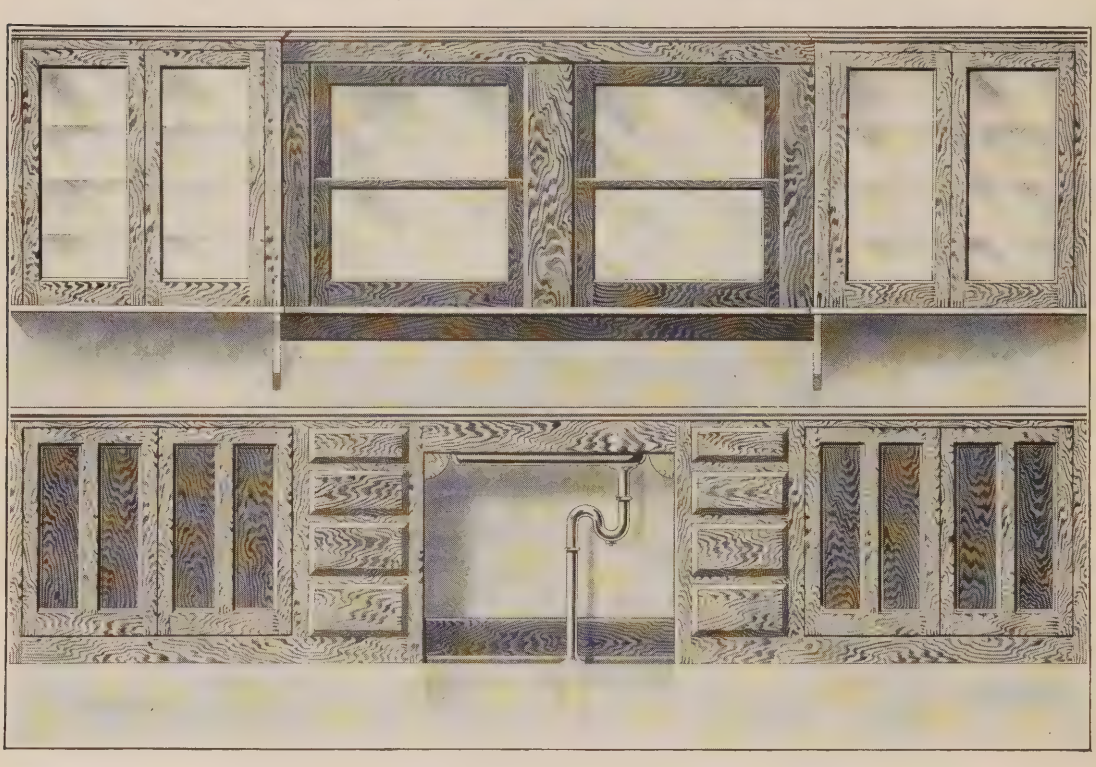
Kitchen Window Case



No. 1635

The Satisfaction derived from a beautiful and comfortable home outweighs all other considerations. No home is complete, no home has reached that degree of comfort necessary to the complete enjoyment of home life unless it is furnished with judgment and in good taste. **Our High Grade Cabinet Work** will do more to convert a house into a home than anything else of equal cost.

Our Kitchen Window Sink Case is a very popular design which is being installed in most of the better quality residences and bungalows. The two upper cases are usually made 3 ft. wide, 4 ft. high, with finished ends at sides of windows; these cases are glazed clear glass and can be used to store dishes. In the lower section are pot closets and drawers. If desired one of the lower sections can be made a tilting flour bin. Cases are furnished put up complete as shown, bottom section, 18 inches deep; top section, 12 inches deep.

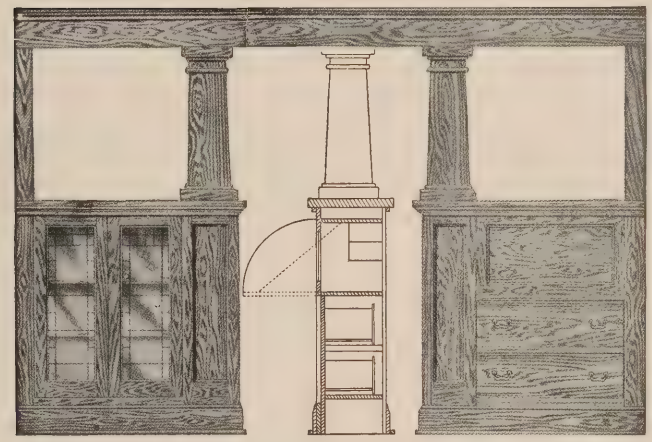
Bookcase and Desk Colonnade

Square Columns

Price $45.00 Glazed



Bookcase and Desk Colonnade No. 1613

The latest and most up-to-date Bookcase and Desk Colonnade. In this illustration we show the most approved Colonnade in the market. You will note that this Colonnade has, in addition to bookcase, a desk and three pigeon-holes and two drawers. By using this Colonnade you will be able to save considerable space which otherwise would be wasted. When not in use the desk can be closed and is out of the way. The columns are massive and, at the same time, it is well proportioned, and we recommend this combination Bookcase and Desk Colonnade to anyone desiring something up-to-date. The size of the bookcase is 42 inches wide, 42 inches high, and has two shelves. The leaded art glass door is 9x32 inches. Bookcase is 12 inches deep. The columns are 10 inches square, tapering to 8 inches. The cap trim and casing are not included, but could furnish if you wish at extra price. Made for 5½-inch jambs.

PRICE, Yellow Pine or Plain Oak.....$45.00

Glazed Art Glass as shown, panel back. Jambs, casing, and cap trim not included. When ordering give height of opening, width of jambs and **kind of wood wanted.** Hardware $1.00 extra.

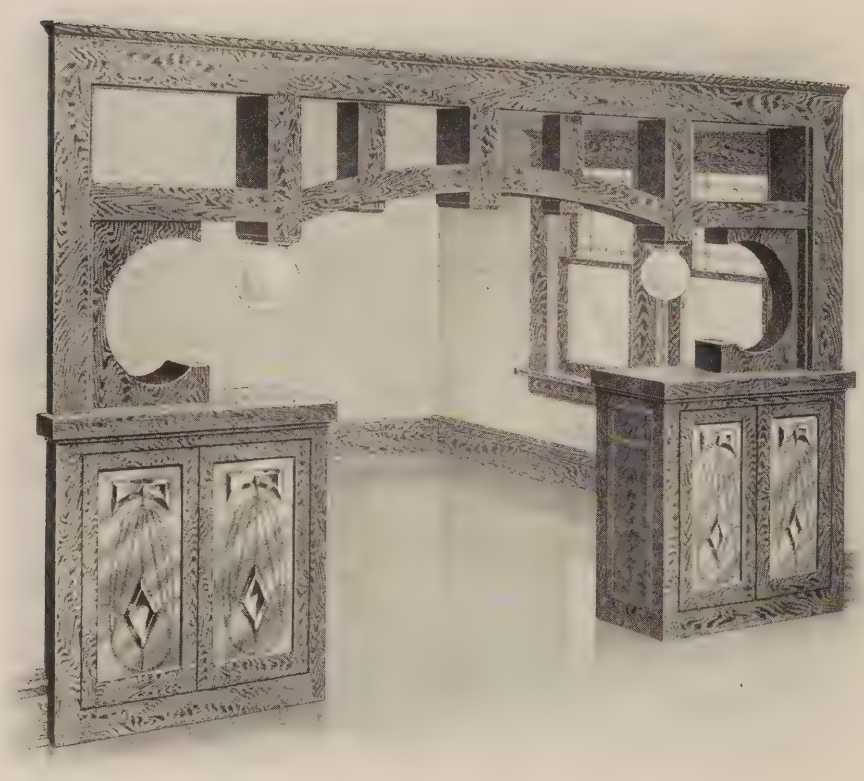
Bookcase Colonnade



Chateau-Thierry

Suitable for openings not less than 12 ft. by 9 ft.

Our very best effort in a Bookcase Colonnade. You will note that this Colonnade has, in addition to two Bookcase Pedestals, two very ornamental Brackets and overhead beams, the main beam on a radius which gives the opening a rich appearance. The Brackets are massive and, at the same time, well proportioned, and we recommend this Bookcase Colonnade to anyone desiring the very best Colonnade to be had at anything like this price. The size of the Bookcase is 44 inches wide, 48 inches high, and has three shelves. The glass in door is 14x35 inches. Furnished in design shown **Clear Crystal Sheet Glass.** Bevel Plate will be furnished, if desired, for small extra charge. Unless otherwise specified, we will furnish Clear Crystal Sheet Art Glass. Bookcase is 10 inches deep. The Brackets are 4-inch face.

Glazed Art Glass, paneled back. Jambs, casing, and cap trim not included. When ordering, give width and height of opening, width of jambs, and **kind of wood wanted.**

PRICE: Clear Red Oak, Birch, Gum, Yellow Pine, or woods of equal value, glazed Art Clear Crystal Sheet Glass, $87.50.

Add $12.50 if Bevel Plate lights are furnished where shown.

Glass designs are interchangeable. Select designs wanted. Unless otherwise specified, we will ship this design.

All prices shown are F. O. B. cars Chicago, Illinois

Doors Suitable for use with Gum Trim

The great demand for Gum Trim has forced us to put on the market a Door especially manufactured for use with this most popular Interior Finish.

Our Lincoln G and Mexico G Doors are furnished in either of the following woods at the same price.

Clear Quarter-Sawed Fir Stiles and Rails with Selected Red Birch Panels —an all Red Wood Door that will match our Figured Gum Trim perfectly or is suitable for use with Oak Trim.

Clear Spruce Stiles and Rails with Selected White Birch Panels—an all White Wood Door that when brought under the same stain will match our Plain Gum Trim, or is suitable for use with Yellow Pine Trim.

Old Growth Yellow Fir Doors

LINCOLN FIR

Can Be Finished Natural to Match Yellow Pine or Stained to Match Oak Perfectly

The natural figure of the grain (especially in the veneers) so closely resembles Plain Red Oak that even under an ordinary stain it is extremely difficult to tell it from the genuine oak.

On the other hand, it is being demonstrated right along that no other wood resembles the soft Yellow Pine as much as Old Growth Yellow Fir—when both woods are finished natural; or Cypress—when both woods are placed under the same stain.

THE MOST ECONOMICAL. BETTER THAN HOME-MADE DOORS AND COST LESS

No. 827
8 ft. x 8 ft. x 1¾ in., glazed D. S.
Price per pair.....**$25.00**

Made to order any size or thickness

There is an increasing demand for a dependable machine made door for barns, shops, factories, warehouses, etc. Formerly it was customary to slap together any material which might be handy and the carpenter made the doors on the job at a cost entirely out of proportion to their value. The doors that we offer on this page fill a long felt want. They are constructed out of selected Cypress, practically clear and suitable for outside use.

All prices shown are F. O. B. cars Chicago, Illinois

French Sash Doors

Carried in Stock for Quick Shipment

FRENCH DOORS Nos. 402 to 407

French Doors are becoming increasingly popular for Vestibule and Interior use. This design is modern and presents a richer appearance than can be obtained in any other arrangement of lights. We especially solicit your orders for odd sizes, which we can make and ship promptly in any kind of wood at very reasonable prices. Send sketch showing arrangement of lights and state size wanted, thickness, kind of wood, and how glazed. Stock Doors have 3½-inch stiles, requiring narrow basket locks, which we can furnish (see Hardware). Any width stiles can be furnished in special made-to-order doors.

Veneers ¼ inch Thick

Glass set with wood stops. Prices per pair, 2 doors, 1¾ in. thick.

Opening Size	CLEAR WHITE PINE			VENEERED RED OAK

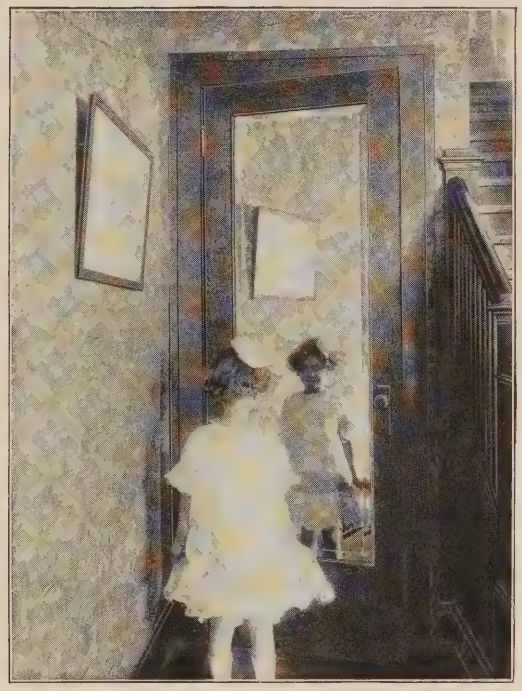
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Mirror Doors



Mirror Doors Are No Longer a Luxury—They Are a NECESSITY in Every Up-to-Date Residence and Apartment Building

Most homes now being built are fitted with one or more mirror doors. These doors are sometimes placed in the hall but more often in bedrooms or dressing rooms, and as a convenience their value cannot be overestimated. Any chamber door leading to hall or closet may be fitted with a full length mirror at so reasonable a price that all builders should insist on having at least one.

Old Homes Now Equipped with plain panel doors may be fitted with this convenience by replacing the old doors with our mirror doors. This may be easily and quickly done at slight expense. We carry in stock all the designs listed below and no matter what kind of doors you now have you will probably find one that will answer your purpose in our list.

DIRECTIONS FOR ORDERING

Give size, kind of wood and arrangement of panels of other doors in same room.

These doors should be used in bedrooms for closet doors. The best results are obtained if dresser can be placed directly opposite door, enabling party using mirror to have front and back view at same time.

NOTE — Our competitors do not quote on beveled plate. Plain plate is worth $2.50 per door less. We recommend the use of beveled plate.

1⅜ in. thick, glazed 1½ in. Bevel Plate Mirror one side—**sunk in door.**

3- 0x7- 0 1¾	12.50	19.00

We use the same care in the manufacture of these doors that we do in the finest cabinet work, assuring our customers of excellency of material, design and durability that is in every way **far superior to solid hardwood doors.** They are light and strong and a positive economy to every builder.

All of our hardwood doors are built in pine cores, interlocked and glued, making a door foundation that is strictly warp proof. Over this core or foundation is applied **¼-inch thick** oak veneer, a product of oak logs of the very best quality.

The veneers are glued with the very best waterproof glue, making a door absolutely weatherproof.

The veneered door, properly made, is a great deal more durable than the solid door, as it will neither shrink, check nor warp.

WALL STAIR STRINGER No. 856

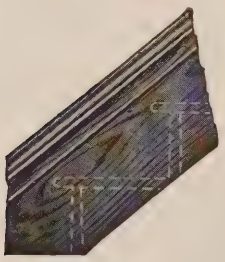
13/16x11 and Mould
Price per lineal ft.
Yellow Pine 15c
Plain Red Oak. 22½c

If stringers are required housed, write for special price on complete flight of Stairs. Send sketch and state kind of wood wanted.

CURB OR CLOSED STAIR STRINGER No. 849

Stringboard 1⅛x11¼ in. Price per lineal ft.
Yellow Pine 35c
Plain Red Oak. 50c
Complete, 5 members.

No. 849



Wall Stair Stringer and Mould should match Base and Base Mould. Send detail. Unless detail is furnished or design numbers mentioned, we will furnish our 8420 and 8421.

FACE STAIR STRINGER No. 857

13/16x11¼ in.
Price per lineal ft.
Yellow Pine 12c
Plain Red Oak. 18c

In the above illustration of Wall Stair Stringer Curb and Face Stair Stringer the dotted lines show the housing for treads and risers made to suit the exact rise and run of the stairs. On account of the fact that this cut must necessarily vary according to the height of story, etc., we do not house the stringers for treads and risers; this must be done on the job by the carpenter.

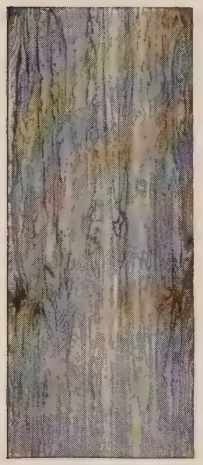
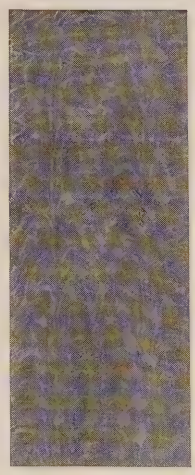
Laminated Veneered Panels

ACTUAL PHOTOGRAPHS OF LAMINATED VENEERED PANELS



Figured Gum

Plain Red Oak



Quarter-Sawed White Oak

Yellow Pine

See opposite page for complete list of Stock Sizes and Net Prices. We make to order panels any size up to 60x144 inches. If the size or combination you want is not listed, write or wire us and we will be glad to quote.

Most satisfactory results can be obtained by using our rotary cut, one-piece face, cross banded core Laminated Veneered Panels for making your own cabinet work or for paneling or wainscoting. Our veneered panels are sanded, ready for varnish finish. They will not check, warp or split. Rotary cut veneered panels show to the best advantage the natural beauty of the grain of the wood.

	Select Figured Gum, set	1.65

Door Trim No. 146

Order your trim as **"sides of trim."** Shipped in the knock-down. Well bundled. Quickly fitted. No waste. No damage in transit. We see that correct amounts are furnished, saving delays often caused by errors in billing.

In ordering, simply give the "side of trim" number, together with the casing number as appears and is described in detail page. For example:

Five Sides of Trim No. 146 for Doors 2-8x6-8, Casing No. K8308.

Six Sides of Trim No. 147 for Windows 24x30—2 lt.

When ordering Sides of Trim give the sizes of Windows and Doors, also selection of Designs, **kind of wood wanted,** width of Mullion Casing, width of Window Stop. If for 13-in. wall, give width of jamb linings and stool. Unless otherwise specified we ship Stool 8267, Mullion Casing 5½ in., Window Stop 8463. Door Stops not included with Door Trim.

Gum—To-day's Most Popular Trim

An All Wood Interior, Showing the Peculiarly Pleasing and Attractive Effects to Be Had with FIGURED GUM Paneling and Interior Cabinet Work—the Best of the Brown Woods

GUM is now recognized as the most popular of all woods used for **Interior Finish, Built-in Furniture, and Stairwork.**

It is often finished to imitate more costly woods, such as **Black Walnut, Cherry, Mahogany** and especially **Circassian Walnut,** since many pieces of this lumber may be selected which have a natural figure closely resembling that of **Circassian Walnut. Figured Gum** finished "natural" does not show finger marks and is easily cared for.

DOORS

We do not carry **Gum** Doors in stock and it has become customary to use Birch Doors with **Gum** Trim, which when brought under the same stain match perfectly. **Gum** Doors made to order at reasonable prices.

INTERIOR FINISH AND BUILT-IN FURNITURE

The natural color of **Figured Gum** is a soft, rich, reddish brown, and it is a wood of rare dignity and charm. There is no wood in the world easier worked or better adapted to any required finish. These qualities make it especially appropriate for the **Interior Finish** and **Cabinet Work** for which it is now being extensively used.

All prices shown are F. O. B. cars Chicago, Illinois

for "FACTS ABOUT FREIGHT CHARGES" see pages 198 and 199

Improved Beveled Inside Door Jambs

Made of Clear Stock in the following woods: Yellow Pine, Oak, Wisconsin Birch, and Gum. Carpenters and contractors cannot afford to make door jambs when high grade jambs such as we list on this page can be had at such reasonable prices. Every piece of lumber going into the manufacture of these jambs is first cut to 7/8x5½ inches, then machined to ¾x5⅜ inch face, beveled back to 5¼ inches, thus allowing Casing to fit tight on face edge of jamb—a great improvement in manufacture, saving labor and assuring better results. The side jambs are dadoed with a machine made for this particular purpose. The head jamb fits into this dado perfectly. All jambs are surfaced and **sanded** with our **heavy sanding machinery** and are ready for finishing when received.

Made to order any size.

Note carefully, our Stock Jambs are ¾x 5⅜, but we will make up special to your order any size, any wood, Transom Head or Sliding Door.

Price per Set, Dadoed and Sanded, Not Including Stops

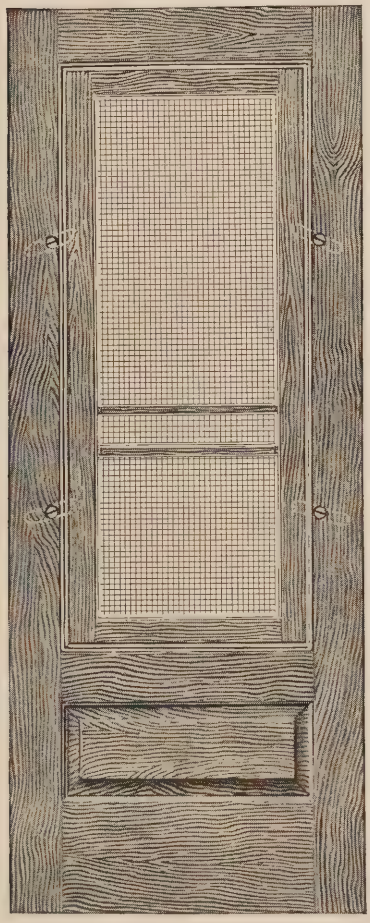
Combination Storm and Screen Door

(With Screen Panel Inserted)

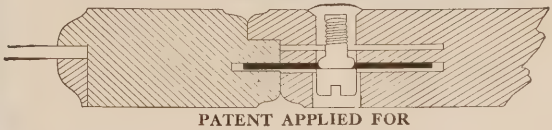


The method of fastening the Screen and Storm panels in our Combination Storm and Screen Door is unique and we consider superior to any on the market, as it overcomes the serious objections to other Combination Doors. You will note from the illustration above that the metal lock is adjustable; each half turn of screw operating lock increases its pressure and holds panel firmly, thereby eliminating the rattling of the removable panels, a fault common to all other Combination Doors.

Observe that the metal lock is not visible and by its insertion into the center of the door stiles, adds to its strength and removes the possibility of its being tampered with. Most removable panels are held in place by catches fastened outside of door stiles and these become loose, caused by constant slamming of door, or are pushed from their fasteners by pressure from the outside. This is not possible with our Combination Storm and Screen Door.

STORM PANEL
Interchangeable with Screen Panel Shown in Door
Glazed Double Strength Glass

PANEL LOCK



PATENT APPLIED FOR

No. 59

Note that our Door is one in which the makeshift appearance by which other Combination Doors are recognized, is entirely missing. This is due to our design, in which the removable panel and door are flush, while in most so-called Combination Doors the removable panel sets out from the Door.

4-in. Stiles, 1⅛ in. thick. Selected White Pine, sanded and smoothed after assembling. Ogee finish on inner edges. Furnished "In the White." Screen Panel wired with 14-mesh Galvanized Wire Cloth—Storm Door Panel glazed D. S.

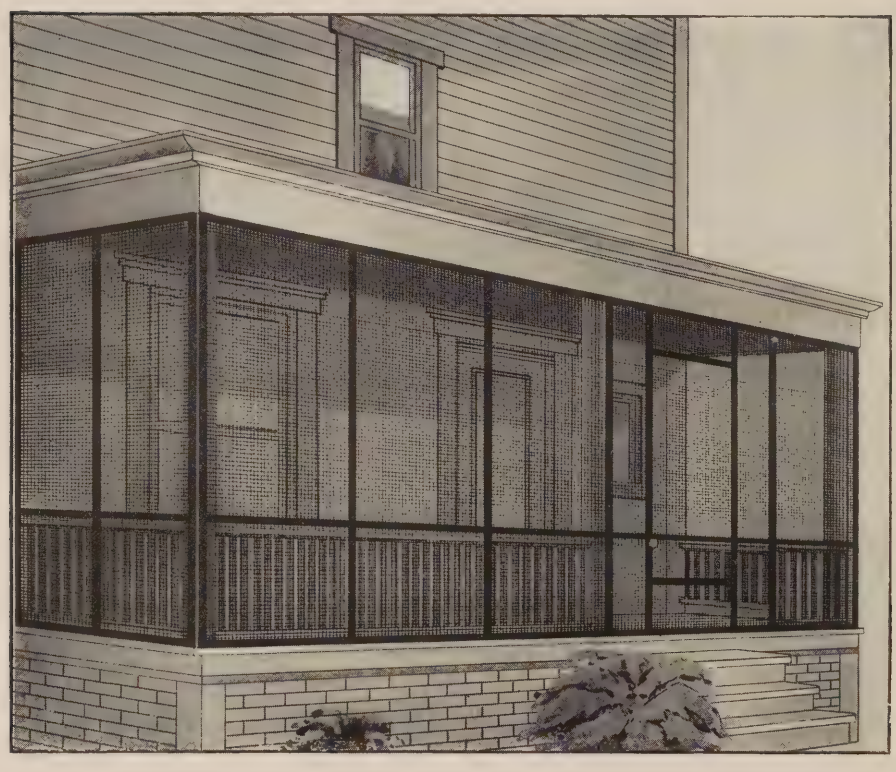
Screened-in Porches



Another room and unlimited comfort added to your home through the use of screens on your porch.

The cost question is entirely within your hands, as we manufacture the screens to your special requirements and you can screen in all or part of your porch as you see fit.

A modern comfort you cannot afford to be without when you realize that it serves a twofold purpose—**summer living room** during the day—**sleeping room** at night.

Screens are made of 1⅛-inch thick **Western White Pine Lumber,** dressed and sanded two sides in sections suitable for handling and storage in winter season. The sections are carefully mortised, tenoned and pinned together with steel pins, and wired with our best wire cloth—standard 12 mesh to the inch—painted black two sides, or our high grade **Galvanized or Copper Bronze** wires.

We recommend that screens be fitted on outside of porch columns for the reason that this permits all square corners, obviating any fitting around the mouldings of columns and rails as is necessary when screens are placed on the inside of the columns.

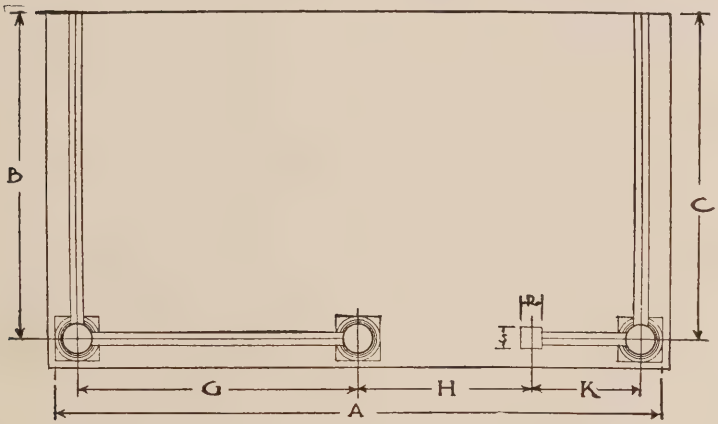
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Screened-in Porches



Floor Plan of Porch (see "How to Order")

HOW TO ORDER

Make a rough sketch similar to floor plan shown on this page, indicating house lines and number of columns and posts as well as entrance to porch. Give width of porch from face of house line to center of column. Give length of porch from center to center of end columns, also indicate the size of the square members of the base and cap of columns. Give height from floor to top of porch rail so that cross rail can be placed at proper height. The slant or pitch of porches varies in different sections, and for this reason it is advisable to give the height from floor to boxing at both house line and outside of porch as indicated by lines E and F in cross section.

As further check on measurements it is advisable to give distances from center to center of each column or post as indicated by lines G, H and K on floor plan.

If the different porch sections are desired rabbeted at joints order must so state, as extra allowance must be made for the rabbets.

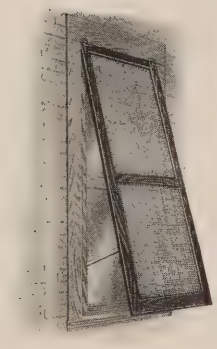
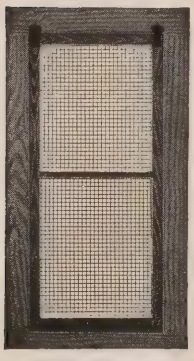
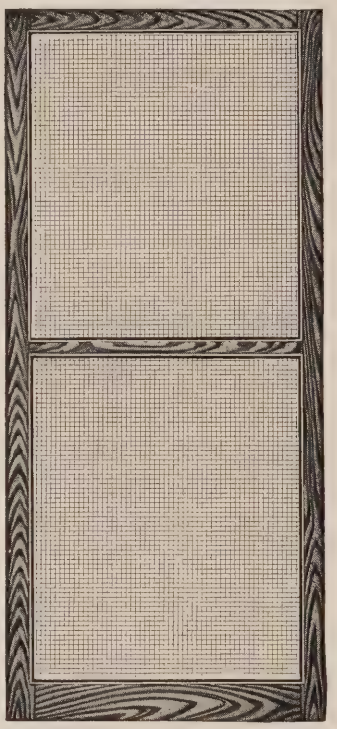
Best on Earth Window Screens

Riverdale Full-Size Window Screens

These Screens Cover the Entire Window on the Outside







No. 466

The essential features of a Full Length Screen are:

Positive protection from insects of every description.

A screen that can easily and conveniently be operated in wet or dry weather, requires no sliding or shifting up or down, and insures perfect ventilation.

The illustration at left (No. 466) demonstrates all the above mentioned features and it will also be noticed that the windows can be washed without removing screen. This type of screen is made 1⅛ in. thick. Measure full size, same as you would for a storm sash.

For Prices see next page

May Be Used as

Stationary Screen—Securely fastened.
Hanging Screen—Hinged to top of window.
Swinging Screen—Hinged to side of window.
Admits of free use of either upper or lower sash without admitting insects.

Construction

Pine Frames, 1⅛ in. thick; stiles or side pieces and top rail, 2 in. wide; lock (or center) rail, 1 in. wide; bottom rail, 3½ in. wide; **mortised and tenoned joints.** Edge of wire cloth is covered with beaded moulding, mitered joints.

Full-size screens are finished with one coat of black paint, 12-mesh black wire cloth.

We carry a large assortment of sizes in stock, painted black, with black wire cloth, and are in position to promptly fill orders for these screens to fit any regular two, four or eight-light windows.

NOTE: In ordering these screens, specify size of glass, number of lights and outside measurement of screen, thus: 24x30—2 light; opening 2 ft. 4⅛ in. by 5 ft. 7 in.

Please send orders for screens to amount to not less than $5.00 At these wholesale prices we cannot afford to crate and make shipment of a less amount.

All prices shown are F. O. B. cars Chicago, Illinois

Best on Earth Window Screens

Our Window Screens are made from thoroughly dried Pine Lumber with mortised and tenoned joints, to prevent warping, sagging or opening. The edge of the wire cloth is covered with beaded moulding, mitered and carefully fitted into place, insuring a neat, workmanlike finish. We use the best black wire obtainable, but can also furnish rustless galvanized and Copper Bronze Wire when desired. Black wire will last indefinitely if painted every year.

Cellar Screens

Strong, serviceable cellar screens with woodwork painted black. Mortised and tenoned joints. Will not warp or sag.

All sizes up to and including 2 ft. 10 in. x 2 ft. Black wire.

Price 63c

Half Size Window Screens, ⅞ in. or 1⅛ in. Thick

Made from Clear Pine Lumber dressed and sanded to proper thickness. Constructed exactly like full size screens and made full width of window to set in blind rabbet against outside of blind stop. When ordering give glass size and number of lights in your window.

Sliding Screen

We also make these half screens to slide up and down on a small moulding nailed to the blind stop. These screens are 1 in. (width of blind stop) narrower than window to set on blind stop.

Price—The price of half screens take one-half the price of a full-size screen with same size glass, and: If ⅞ in. thick add **15c** net extra; if 1⅛ in. thick add **20c** net extra.

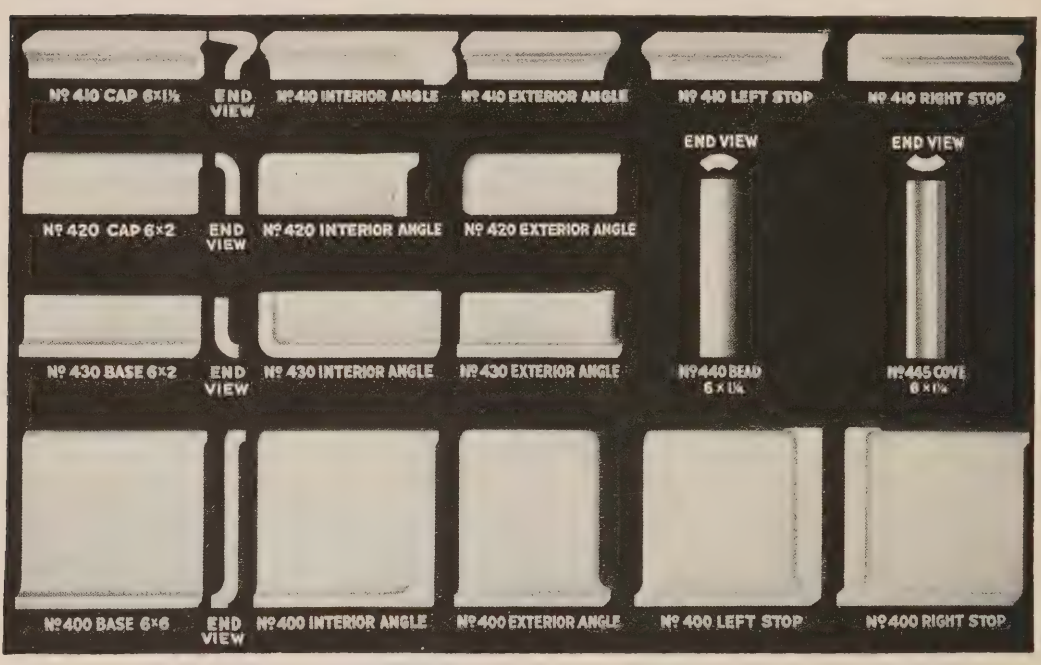
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Glazed White Wall Tile



The right and left stop pieces must be used wherever there is an opening in the wall so that the base and cap may finish neatly against the wood trim. Angle Bead No. 440 is used where the wall tile goes around convex or exterior angles. The Cove No. 445 can be used for the interior angles, although the common practice is to simply make a right angle with the wall tiles themselves. This cannot be done at the exterior angles as the ends of the wall tiles are not glazed. Cap No. 420 and Base No. 430 do not have the right and left stop pieces, as they can be butted up to the door and window trim on each side and will not project out beyond the thickness of the casing.

Send us Floor Plan showing size of room, location and size of doors and windows, and we will ship correct amount of all above items required.

For itemized price per piece see opposite page. Average price, all items shown above included, 80c per square foot of wall to be covered.

We are offering first quality white wall tile in standard sizes with a complete layout of base, cap and angles at reasonable prices. We guarantee our wall tile to be the equal of any. We give full directions so that you can lay it yourself or you can have it done by any good cement worker. You can now realize the dream you have undoubtedly had many times of some day having a fully tiled bathroom, kitchen or vestibule. Everyone who builds or remodels a home can now afford to put in tile floors and walls, at least in the bathroom and kitchen. If you have any difficulty at all in figuring the cost from the prices we quote, just send us your plans, blue prints or pencil sketches, tell us which style of cap and base to figure on, and how high up on the walls you want the tile to come, and we will advise you just what the complete cost of the tile will be.

Ceramic Mosaic Floor Tile

FLOOR TILE EASILY LAID

Floor Tile is made up of ¾-inch squares or 1-inch hexagons pasted on sheets of paper, about 2 feet long and 1 foot wide. The design is perfectly arranged on the sheets so the laying of the tile is a very simple matter. See full instructions, sheets 164 and 165.

FREE SKETCHES AND ESTIMATES

If Your Requirements make it difficult to order directly from these pages, send us a sketch of your room. Tell us the kind of tile desired and we shall gladly mail you a sketch and a free estimate, showing how your floor will appear when laid, and exactly what the tile will cost you. This service is free.

COLOR DESIGNS

It is Impossible to Show on these pages all the beautiful effects that may be produced with the use of Ceramic Mosaic Floor Tile.

Where Colors Are Shown for the borders or on field, we can supply red, chocolate, buff, salmon, light gray or dark gray, pearl, sage, green, pink, blue, black or almost any color desired.

TILE IN THE BATHROOM

The bathroom more than all other rooms must be kept clean and sanitary. The paramount virtue of tile in the bathroom is its imperviousness to moisture and dirt, the breeders of germs. Water splashed on a tile floor cannot soak in, and dirt on the floor or wall does not penetrate the tile but is easily wiped off with a damp cloth. Everyone is familiar with the superiority of white porcelain bathtubs and lavatories over the old painted tin tubs and marble wash bowls so common a generation ago. You are also familiar with the demand for open plumbing. The same conditions that required the abandonment of painted fixtures and boxed in pipes demand the use of tile floors and walls. The idea of having a white tiled bathroom is the same as having a white porcelain tub. When all dirt can be seen it is an easy matter to keep the room and fixtures clean.

SHIPPED FROM TILE FACTORY IN OHIO

Price shown for Tile is F. O. B. cars our Tile Factory in Ohio. Weight about 3 lbs. per square foot. Takes a very low rate of freight. For rate, see Freight Information, page 199.

Ceramic Mosaic Floor Tile

CERAMIC TILE FOR PORCHES

The use of Ceramic Roman Mosaic Tile for porch and veranda floors is becoming more and more popular. The tile meets every demand required of a good porch floor, and has many points in its favor not possessed by any other material. It is absolutely impervious to moisture and is superior to cement, for almost any design or color scheme required can be worked out with the many colored small tiles.

For design especially suitable for porch floors we invite your attention to No. 1023. When properly laid in good Portland cement it will withstand frost and all other actions of the weather. In large cities ceramic tile is largely used for sidewalks in front of stores, theaters and restaurants. Previous to the time we first offered ceramic tile in our catalogs a tile porch floor was a luxury enjoyed by only the most wealthy, but now by means of our wonderful methods of buying and selling we have placed this perfect material within the reach of all. One of the chief advantages of ceramic tile for porch and veranda floors is the ease with which it can be kept clean. An occasional mopping with soap and water is all that is required. The tile being fully vitreous is non-absorbent and for this reason the dirt needs only to be wiped off from the surface. Scrubbing is unnecessary.

Our No. 1023 when laid for Veranda Floor has the appearance of large tile 7 in. by 7 in. square, with mortar joint between.

Price, per square foot, No. 1023, ¾-in. squares, Colored as shown, mounted on paper 50c

No. 1023 can be furnished in any size square desired—7x7 in., 6x6 in., 5x5 in., etc. State size wanted. Unless otherwise specified, we will ship size illustrated.

TILE FOR HOTEL LOBBIES OR STORE ENTRANCES

If you have a vestibule, a small room or a doorway entrance, whether it be at your residence, your store, or your office, or if it be a drug store, ice cream parlor or any place of business where pure, sweet, clean and sanitary floors are desired, send us your order and we will furnish you either of these handsome designs papered ready for laying. We guarantee it to be one of the best sanitary floorings you can buy.

Price, per square foot, No. 1022, ¾-in. squares, Colored as shown, mounted on paper 50c

EASY TO CLEAN

Cleaning tile floors is a pleasure, not work. And they stay clean, too, so much longer than any other kind. Back-breaking scrubbing is forgotten when you have tile floors in your kitchen, bathroom, vestibule or place of business. The cost of this ideal floor has been greatly reduced by our system of selling, and we give you complete instructions so that an expensive expert tilewright is not required for the work of laying your tile floor.

The color scheme of the design you like can be changed to suit your ideas.

Nothing compares with white tile for bathroom floors, pantry floors, or creamery floors. Nothing is recognized as so suitable for hospital service rooms and operating rooms. Send us your order with a sketch and careful measurements for a bathroom or any other room where pure, clean, sanitary conditions must prevail.

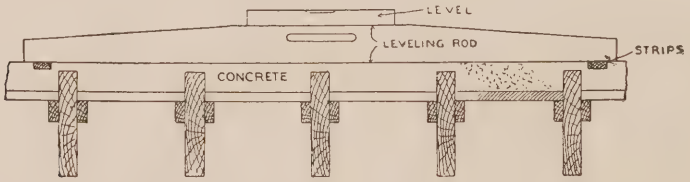
Scheme for Laying Ceramic Tile Floor

In laying Ceramic Mosaic Tile Floors in concrete it is first necessary that enough space be allowed for concreting and the cement bed on which the tile is laid. This requires about 3½ inches. In order to prepare for concrete the floors should be lowered between the joists as illustrated in the following plan:



The concrete to be filled in 2½ inches of this space is made of a mixture consisting of the following material:

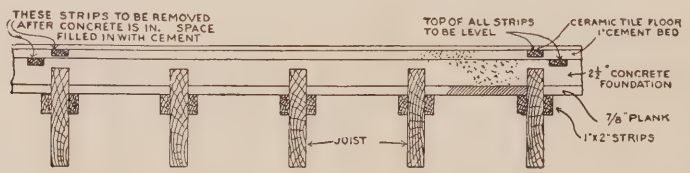
CRUSHED STONE CONCRETE

Five parts of crushed stone.
Two parts of sharp sand or creek sand.
One part of cement.

GRAVEL CONCRETE

Five parts of sand and gravel.
One part of cement.

After the concrete is filled in 2½ inches thick, wood furring strips 1 inch thick by 2 inches wide should be laid on this concrete and leveled in the length and across the floor by the use of an ordinary level and leveling rod as illustrated above. After the concrete has set, a cement bed 1 inch in thickness mixed in proportion of two parts of sand, one part of cement and a very little slacked lime with it should be prepared. The lime is to keep the cement from setting too quickly, but if the job is small and the tile can be easily laid before the cement takes its initial set, no lime at all need be used. If a large floor is being laid, only about 50 square feet should be prepared at one time.



THESE STRIPS TO BE REMOVED AFTER CONCRETE IS IN. SPACE FILLED IN WITH CEMENT
TOP OF ALL STRIPS TO BE LEVEL
CERAMIC TILE FLOOR 1" CEMENT BED
2½" CONCRETE FOUNDATION
⅞" PLANK
1"x2" STRIPS
JOIST

This is to be gauged off with a leveling rod the same as before, after which the strips are to be removed in this case and the space filled in with the same mixture of cement. (See next page.)

All prices shown are F. O. B. cars Chicago, Illinois
for "FACTS ABOUT FREIGHT CHARGES" *see pages 198 and 199*
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Scheme for Laying Tile Borders

STRIPS TO BE REMOVED WHEN BORDER IS LAID
ALL STRIPS 1"x2" ABOUT 10'0" LONG
WOOD STRIP TO RUN ALONG EACH SIDE OF BORDER
BORDER
CEMENT BED

You are now ready to lay the tile which should have been previously laid out on the floor, bottom side up, to facilitate the finding of the proper sheets. Start at one side of the room and lay the border first, paper side up. Lay the corner pieces and then work the border from the corners to the middle so that if the space will not permit the design to work out evenly, the break or mismatch in the border will come in the middle instead of near the corner, where it would be more noticeable. The body sheets are about 2 feet long by 1 foot wide and must be laid so as to bring the dots or figures in straight lines. It is necessary to tear the paper and use a half sheet in starting the body of some of the designs. When the sheets of tile are down, level them with a block and hammer. Then remove the paper by moistening it with a sponge or brush and pulling it off gently. When the paper is all off it is again necessary to go over the floor with the block, simply rubbing it to make sure none of the little tiles are tipped up or depressed. This part of the operation should be very carefully done, for when the cement once sets it is very difficult to make any corrections. While the cement is still fresh, remove enough along the line where the setter ends his work to leave a perfect edge so that when starting the next section it will be an easy matter to connect the two.

When the entire floor is laid it is necessary to fill the joints at the surface, as the under side of the tile has only been pressed into the cement below, which rose partially toward the surface of the tile. To accomplish this, Portland cement mixed with water to the consistency of thick cream is floated over the entire surface and rubbed into the joints with a flat trowel, allowing it to set from fifteen minutes to not over twenty minutes, when some sawdust should be thrown over the entire surface and the cement removed by rubbing well the sawdust on the surface of the tile. This will give you a finished Ceramic Mosaic Floor, perfect in every respect, clean, sanitary and pure.

Following these rules, instructions and diagrams, a perfect floor can be laid in the most approved manner without the use of an expensive tilewright from a distance, or, if located in a large community where tilewrights are found, you need not pay the high rate charged for this class of work, for you will have demonstrated to yourself that you can do it as well as anyone.

FREE SKETCHES AND ESTIMATES

If your requirements make it difficult to order directly from these pages, send us a sketch of your room. Tell us the kind of tile desired and we shall gladly mail you a sketch and a free estimate, showing how your floor will appear when laid, and exactly what the tile will cost delivered to your station. This service is free.

COLOR DESIGNS

It is impossible to show on these pages all the beautiful color effects that may be produced with the use of Ceramic Mosaic Floor Tile.

Where colors are shown for the borders or on field, we can supply red, chocolate, buff, salmon, light gray or dark gray, pearl, blue, sage, green, or pink—all interchangeable.

Slate Surfaced Asphalt Strip Shingles

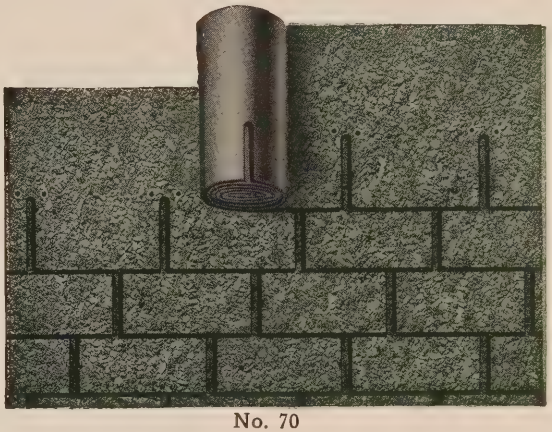
Red and Green Strip Shingle — Chip Slate Surface

No. 70

Strip Shingles Are Made of the same high grade felts and asphalts as the Slate Surfaced Shingles shown on another page and in exactly the same colors and finish.

It Is More Easily and Quickly Laid than shingles because it is made in rolls and the time required to handle individual shingles is entirely done away with.

In Addition to the Time and labor saving features Strip Shingles possess all the artistic qualities of the regular slate covered shingle, and makes a stronger and safer roof. It will not curl, crack or buckle on the roof and has strong fire resisting qualities. The colors are soft, attractive and absolutely permanent.



No. 70

Standard: 10 in. wide, 75 ft. long. Weight, 190 lbs. per Square. 2 Strips to the Roll. 2 Rolls to the Square. Laid 4 in. to the Weather

Colors: Red and Green

Especially Adapted for Use Over Old Shingles

Price for Sufficient Roofing to Cover 100 square feet $5.75
Above Pattern Furnished also in Slabs, 12x32 inches, at, per square 5.95

RED AND GREEN SLAB SHINGLES "4 IN 1"

This Style of Shingle has been designed and made to meet the increasing demand for any easy-laying, decorative shingle. The exposed portion of the slab gives the appearance of the individual type shingle, and the top or covered part is a four-shingle self-locking slab.

Easy to Lay. The fact that each slab is equivalent to four shingles and that the ends form an interlocking joint, makes this style of roofing very easy to lay. The rapidity and ease with which the slabs may be placed in position will form a strong appeal where time is an element to be considered.

This "4 in 1" Slab Shingle is made exactly like our Red and Green Asphalt Shingles. The same heavy rag felt is impregnated with the same high-test asphalt and covered with the same selected grade of chipped slate. The only difference lies in the method of cutting the shingle to secure the desired shape.

The Size of Each Slab is 32 inches wide and 12 inches high. It requires 112 slabs to cover 100 square feet laid 4 inches to the weather. Put up in packages of 56 slabs each; two packages for each square. Shipping weight, about 200 lbs. per square. To lay one square two pounds of galvanized nails are necessary. We can supply these nails at 9c per pound.

We Guarantee This "4 in 1" Slab Shingle to give satisfactory service for fifteen years, without painting or any attention whatever.

Soft Red and Green crushed slate is used to cover this shingle. These colors are permanent and will never fade. The shades are soft and rich and will blend with different color schemes of paint.

Price of sufficient Shingles to cover 100 square feet:

No. 69—Grayish Green $5.95
No. 69—Soft Red 5.95

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Slate Surface Asphalt Shingles

RED AND GRAYISH GREEN
Nature's Own Colors—Will Never Fade

Slate Surfaced Shingles retain their rich color always. They are surfaced with real red or greenish gray crushed slate in natural colors. GUARANTEED TO OUTWEAR WOOD SHINGLES. **Waterproof CLEAR THROUGH the roofing felt with asphalt saturation.** The crushed slate embedded in extra asphalt coating furnishes a never fading color, and makes the roof **practically fireproof.**

THE ONLY SLATE SURFACED SHINGLE ON THE MARKET THAT WILL NOT CURL

ALL SHINGLES ARE OF UNIFORM SIZE, 8x12¾ inches. Unlike wood shingles, there are no culls to be thrown away; there is no labor wasted in selecting the proper sized shingles for the proper place. Can be laid with less labor than wood shingles and look better than a slate roof.

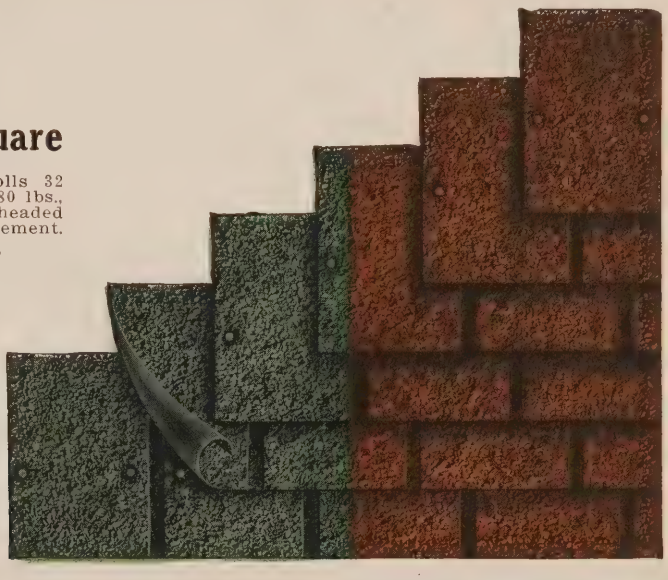
Packed four boxes to the square, each box containing enough shingles to cover 25 square feet when laid 4 inches to the weather and ½ inch apart; 424 shingles will lay one square of 100 square feet. 424 shingles will cover as much surface as 900 wood shingles laid 4 inches to the weather. Can be laid on the same sheathing as wood shingles, even if roof boards are from 1 to 2 inches apart. This means quite a saving where old wood shingles have to be removed and shingles substituted.

OUR PRICE

$6.00 Per Square

Also furnished in rolls 32 in. wide, weight about 80 lbs., packed with large-headed Galvanized Nails and Cement.

Price per square, 108 sq. ft., $6.00



In displaying colors of Shingles we have followed the true colors as nearly as possible

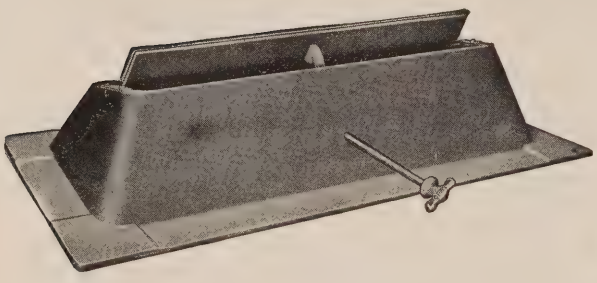
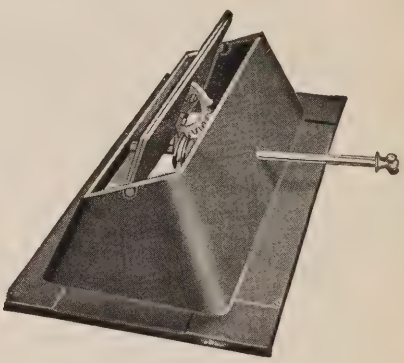
Improved Dome Damper





This is the most popular style Dome Damper made and is one we strongly recommend. The cover is pivoted in the center and is operated by a worm gear which holds the cover firmly in any position. The rod can be quickly adjusted to any length by loosening a set screw in the worm. No cutting or filing necessary.

The knob is solid brass, polished, and is marked to show which way to turn to open. The flange at the sides of the dome are extra wide, allowing great freedom in arranging the angle of the side walls.

This Damper may be used with or without a steel angle

Front and side sectional views of fireplace with the Improved Dome Damper properly installed. The best results will be obtained if the Damper is set on a 4x4-in. steel angle.

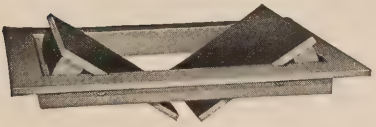
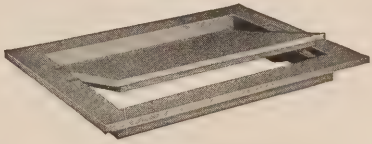
Fireplace Ash Trap Doors



Nos. 1 and 3



Nos. 2 and 4

Properly constructed fireplaces are made so the ashes can be dropped through the floor to the basement. This necessitates the use of ash trap doors in the floor of the fireplace.

Our Ash Trap Doors are made of smooth grey iron castings. The covers are counterbalanced and remain closed except during the operation of dropping the ashes. They are suitable for any size fireplace. They are made in both light and heavy weight. On the Nos. 3 and 4 all castings are heavier and the covers more firmly counterbalanced.

Front View

Flat Ratchet Damper

Anyone who has attempted to regulate the ordinary Ratchet Damper, especially when there was a fire in the hearth, will readily appreciate the advantages of this new damper with its lever directly under the first row of brick. It eliminates all guess work in locating the lever and makes it unnecessary to soil the hands or clothes to regulate the draft.

The lever is easily adjusted by hand or poker and locks in any position the instant it is released.

The Dampers numbered with an X are made with long levers and brackets so a 4-inch steel angle can be used under them and the lever still set under the first row of brick.

FACTS ABOUT FREIGHT CHARGES

The Freight on Flooring Is Nothing Compared to the Saving We Offer You

1000 ft. ⅜-in. Hardwood Flooring can be shipped 400 miles for.....$2.50
1000 ft. 13/16-in. Hardwood Flooring can be shipped 400 miles for..... 5.50
Weight ⅜ in., 1000 lbs.; 13/16-in., 2100 lbs., per 1000 ft. See "Freight Information," pages 198 and 199

How to Arrive at Amount of "RIVERDALE" Flooring Required

To cover a certain space, figure the number of square feet, which means the width multiplied by the length; for instance, a room 12 feet wide by 15 feet long would contain 12 times 15 or 180 square feet. Add to the square feet of surface to be covered the following percentages:

33⅓ per cent for.....13/16x2¼ in.
33⅓ per cent for.....⅜x1½ in.
25 per cent for.....⅜x2 in.

All prices shown are F. O. B. cars Chicago, Illinois

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Pure Wood Fibre Wall Board

See Opposite Page

Used instead of lath and plaster—makes attractive and permanent interiors at moderate cost.

It is made from the best seasoned wood fibre built up into strong, rigid, dampproof boards or panels about 3/16 of an inch thick and of various lengths and widths.

EASILY AND QUICKLY APPLIED

The application of Pure Wood Fibre Wallboard is an easy job for the carpenter or anyone handy with tools. In new work the big panels are nailed to the studding and joists—in remodeling it is laid right over the old lath and plaster, quickly and conveniently, without dirt or litter. The surface is then painted or decorated, and mouldings stained to suit the room are put over the edges.

MOISTURE PROOF

Each panel of Pure Wood Fibre Wallboard is "sized" (both sides) for moisture protection. This gives it full protection from the changes of temperature and weather in shipment and insures firm, even, solid walls and ceilings under all conditions.

It makes unnecessary the use of an additional sizing coat before painting.

SAMPLES

Write for free samples of Pure Wood Fibre Wallboard. These will be sent without cost to you and without placing you under any obligation.

INSTRUCTIONS FOR APPLYING

Complete instructions for applying Pure Wood Fibre Wallboard are furnished with each order. A hammer and nails are the only tools required—any handy man or carpenter can make a fine looking job with ordinary care.

GUARANTEE

We hereby guarantee that Pure Wood Fibre Wallboard will not warp or buckle either on walls or ceilings, or under any ordinary building conditions. We further guarantee to replace any board which does not conform to the representations we have made or the samples we submit. Any unsatisfactory Wallboard may be returned and your money will be promptly refunded, together with any Freight you have paid.

SIZES OF PURE WOOD FIBRE WALLBOARD

In Stock for Immediate Shipment

Pure wood Fibre Wallboard is made in the sizes listed. It is prepared for shipment by bundling with heavy wrapping paper with ends and edges fully protected. It is securely tied and easily handled in dustproof bundles. It is advisable to order in full bundles if possible. The extra cost of handling compels us to charge extra for less than full bundle lots.

Size Each Board, Inches	Square Feet in Each Board	Price per Bundle	Number Boards in Each Bundle	Square Feet in Each Bundle	Weight per Bundle, Pounds
32x 72	16	$10.65	19	304	213

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Pure Wood Fibre Wall Board

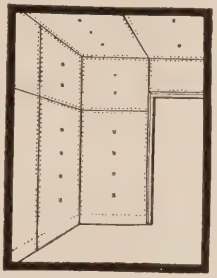
HOW TO APPLY PURE WOOD FIBRE WALL BOARD

These Instructions Appear on Back of Every Panel

1.

USE HEADERS

2x2 in., 2x4 in., or odd pieces to provide a solid nailing for all edges of all panels. Also top of picture mould and top of baseboard. Joists and studs must be level, and evenly spaced.



2

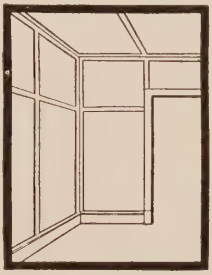
NAILING

Start on ceiling —nail center joists first (x), then edges (.). On walls — begin at top. Nail center studs (x), then the edges (.). (x) one-inch brads—flush with surface, 10 to 15 in. apart, on both wall and ceiling. (.) one in. flathead wire nails, 3 in. apart. ⅜ in. from edge. Leave ⅛ in. between edges of all panels.

3.

PAINTING

Use any good paint. No sizing is needed — Pure Wood Fibre Wallboard is already surface-sealed and sized. Paint before putting strips over joints. Never paper over Wood Fibre Wallboard. If you want to use wall paper over wallboard use our Riverdale Fireproof Wallboard shown also in this catalogue.



4.

COVERING JOINTS

Use decorative strips of wood at least 2 in. wide. They should be painted or stained to harmonize with other woodwork.

OVER OLD PLASTER—Nail and paint as above—using longer nails and brads.
OVER BRICK OR CONCRETE—Fur the walls—then proceed as above.

PANEL STRIPS

Panel Strips are used over the joints of Pure Wood Fibre Wallboard to form neat panelled effects. We suggest the use of strips not less than 2¼ inches in width to produce the most artistic effects. Smaller strips may be used with excellent results on inexpensive work.

No. 8722

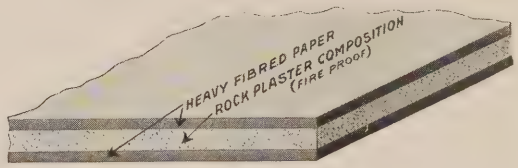
"Riverdale" Fire Proof Wall Board

FACE PAPER SIZED READY FOR WALL PAPERING— AN EXCLUSIVE FEATURE

Compare our samples with others—There is a Difference. Ours is the Best.



WHAT IS RIVERDALE WALL PLASTER BOARD?

(See opposite page)

It is a non-inflammable material made with a rock plaster composition center between two thicknesses of very heavy fibre board.

An especially prepared surface paper is used in the process of manufacture. The paper becomes so saturated with the gypsum composition that it will not ignite from a direct flame.

Composition of Riverdale (see illustration): Mineral composition center, between two layers of heavy fibre board. It is 5-16 inch thick.

Riverdale is one of the greatest advancements made in building materials in years; it is an improvement over lath and plaster that should not be overlooked. The first cost is less than lath and plaster, and there is no upkeep cost.

Think what the following advantages mean:

No dirty lath marks on your ceiling, spoiling your decorations.

No cracks, big or little, such as lath and plaster always show.

You are free for all time from faults and dangers of lath and plaster, no cracking, no unhealthy dampness, **No Spoiling of Decorations,** no falling from jars or vibrations, leaky roofs or pipes.

You have instead a permanent kiln dried wall which is put up quickly and neatly.

GUARANTEE

We hereby guarantee that Riverdale Wallboard will not warp or buckle either on walls or ceilings, or under any ordinary building conditions. We further guarantee to replace any board which does not conform to the representations we have made or the samples we have submitted; or any unsatisfactory Riverdale Wallboard may be returned and your money will be promptly refunded.

No Panel Strips are necessary to conceal unsightly joints, because if the simple directions are followed, the joints will be easily concealed by the decoration, either paint, paper or kalsomine. By using the joint filler which is furnished free with each shipment the entire surface becomes one solid, rigid wall absolutely smooth and flat.

(See opposite page for prices.)

Directions for Ordering
AND MAKING LISTS FOR ESTIMATES

Follow them, giving all particulars, and we can figure your lists and enter your orders immediately. Otherwise we are obliged to write for more information.

GIVE WIDTH FIRST—THEN HEIGHT

In all Millwork this is the universal rule:

2-5x1-4 always means 2-5 wide by 1-4 high.
1-4x2-5 always means 1-4 wide by 2-5 high.

WINDOWS AND SASH
TERMS USED AND WHAT THEY MEAN

Sash indicates a single piece.

Window means two pieces, an upper and a lower sash, made with either plain or check rail.

For regular sizes, give all the following information in the order named: 1st—Size of Glass. 2nd—Number of Lights. 3rd—Thickness of Wood. 4th—If Windows, whether Plain or Check Rail. 5th—State if Open or Glazed and describe kind of Glass required.

For Odd Sizes give size of opening to be filled, in addition to above description. Measurements in inches always mean glass size; in feet and inches they mean the outside measure or opening.

Illustration:

1 Sash 24x36—1 lt., means glass size.
1 Sash 2-4x3-5—1⅜—1 lt., means the opening size is 2 ft. 4 in. wide and 3 ft. 5 in. long.

DOORS

Always give all the following particulars in the order named: 1st—Width. 2nd—Height. 3rd—Thickness. 4th—Quality. 5th—Number and Arrangement of Panels. 6th—If Door has Name or Number, give that. 7th—If Door is Glazed, state Size of Glass and whether D. S., Plate or Figured.

MOULDING AND CABINET WORK
Be Sure to Specify Kind of Wood Wanted

If Cases set in Wall Recess, send sketch showing size of opening.

Important—If you give numbers from any other catalogue, state whose book and date of issue.

Splendid Quality has made our Millwork Popular.

SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES

Safe Delivery Guaranteed

PROVIDING YOU COMPLY WITH THE FOLLOWING INSTRUCTIONS

If goods do not arrive within a reasonable time, notify us, and our Traffic Department will promptly trace the shipment until it arrives at destination.

HAVE YOUR RAILROAD AGENT MARK EVERY SHORTAGE, BREAKAGE OR DAMAGE ON FREIGHT BILL

Do not sign receipt or pay freight or express charges until you have compared the NUMBER of bundles, pieces, etc., called for on our Bill of Lading, with that shown on the freight bill, and if there is any evidence of shortage, breakage, or damage of any kind, have railroad agent make notation to that effect on the freight bill, before you accept shipment. Then notify us at once and enclose the marked freight bill. If there is any shortage, we will trace missing material and in case it does not turn up in a few days, will duplicate it free of charge on condition that the missing items will be refused by you in case they arrive afterward. In case of breakage or damage if there is not time to return goods for repairs, have articles put in good condition locally, send us bill and we will send you our check for the amount.

These instructions apply on all shipments whether transportation charges are prepaid or collect.

Follow these instructions and we guarantee to stand between you and any possible loss or damage.

Diamond Mesh Expanded Metal Lath

No. 1

Illustration Shows Exact Size of Mesh

Diamond Mesh Expanded Metal Lath No. 1 is in widespread use as a base for interior and exterior plastering and stucco work. Used in connection with an incombustible plastic material it affords excellent protection for the structural parts of the building as well as providing a fire-resisting and vermin-proof support for plaster.

PREVENTS CRACKING OR FALLING OF PLASTER

Diamond Mesh Expanded Metal Lath No. 1 is the cheapest permanent plaster-supporting material. The mesh is so shaped that it grips and holds the plaster firmly, prevents waste of material, and since it expands and contracts in the same ratio with the plastic covering, **cracking or falling of the plaster is positively prevented**—the walls remain perfectly smooth and firm. **Diamond Mesh Expanded Metal Lath No. 1** can be easily cut or bent to any **desired shape.**

Furnished in the following size and weight:

No. 27 Gauge. Size of sheet, 18x96 in. Weight, 2 1/3 lbs. per square yard. Packed 9 sheets (or 12 square yards) to bundle.

Price, per Bundle.....**$5.00**

Orders filled for full bundles only.

Facts About Freight Charges

THE FREIGHT ON MILLWORK IS NOTHING COMPARED TO THE SAVING IN PRICE WE OFFER YOU

On an average Local Freight Shipment of Millwork the freight is about 3 per cent of the total cost, and in Carload Lots it is about one-half as much.

HOW TO SAVE FREIGHT

All railroads have minimum charges, which vary in different parts of the country. As a matter of economy we suggest that our customers see that their orders include sufficient material to make shipment weigh 200 pounds or more.

Chicago, the greatest railroad center in the world, with 48 trunk lines, reaches every city in the United States, moving direct with quicker action than from any other shipping point.

When you place your order with us for both lumber and millwork, so that carload shipment can be made, you reduce the freight charge to the very lowest point. When millwork is ordered shipped by local freight, you can readily determine the approximate amount of freight you are going to pay by looking at the following tables. These weights are the shipping weight of a great many items that you will be needing, and other articles not shown in this list made of wood, like brackets, stair work, odd windows, doors, porch work, or any manufactured work in wood, it is safe to figure in a general way soft wood 2 lbs. to each foot of material in the work, and hardwood, or Yellow Pine, at 2½ lbs. per square foot of material.

	Average, lbs.
Balusters—Porch, 1⅜x24, each	1
Balusters—Stair, 1¾x28, each	1½
Blocks—Base, each	1¼
Cabinet Work, per front foot, about. (Viz.: A Buffet 6 ft. x 5 ft. weighs 300 lbs., glazed.)	10
